

ABSTRACT

VIDEO CODING

5 A method of encoding a video signal representing a sequence of pictures, the
 method comprising comparing a first picture with a second picture, calculating
 a measure of the similarity between the first and the second pictures,
 comparing the measure of similarity with a predetermined criterion of similarity
 and, when the measure of similarity does not meet the predetermined criterion
 10 of similarity, outputting an indicator indicating that a non-temporally predictive
 error concealment method should be used by a subsequent decoder and,
 when the measure of similarity meets the predetermined criterion of similarity,
 outputting an indicator indicating that a temporally predictive error
 concealment method should be used by a subsequent decoder.
